1	Lab 7: Error Debugging with AI: Systematic approaches to finding and fixing bugs **Lab Objectives:** • To identify and correct syntax, logic, and runtime errors in Python programs using AI tools.	Week4 – Wednesday

- To understand common programming bugs and AI-assisted debugging suggestions.
- To evaluate how AI explains, detects, and fixes different types of coding errors.
- To build confidence in using AI to perform structured debugging practices.

Lab Outcomes (Los):
After completing this lab, students will be able to:

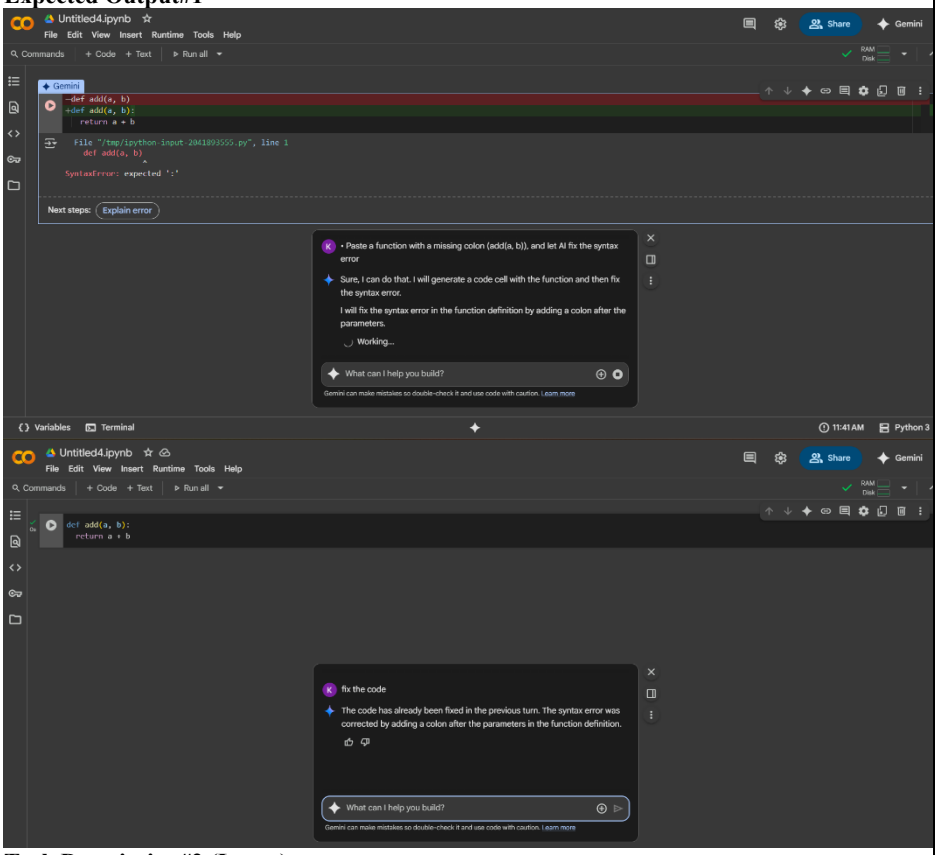
- Use AI tools to detect and correct syntax, logic, and runtime errors.
- Interpret AI-suggested bug fixes and explanations.
- Apply systematic debugging strategies supported by AI-generated insights.
- Refactor buggy code using responsible and reliable programming patterns.

Task Description#1

- Paste a function with a missing colon (add(a, b)), and let AI fix the syntax error.

```python
def add(a, b)
    return a + b
```

Expected Output#1

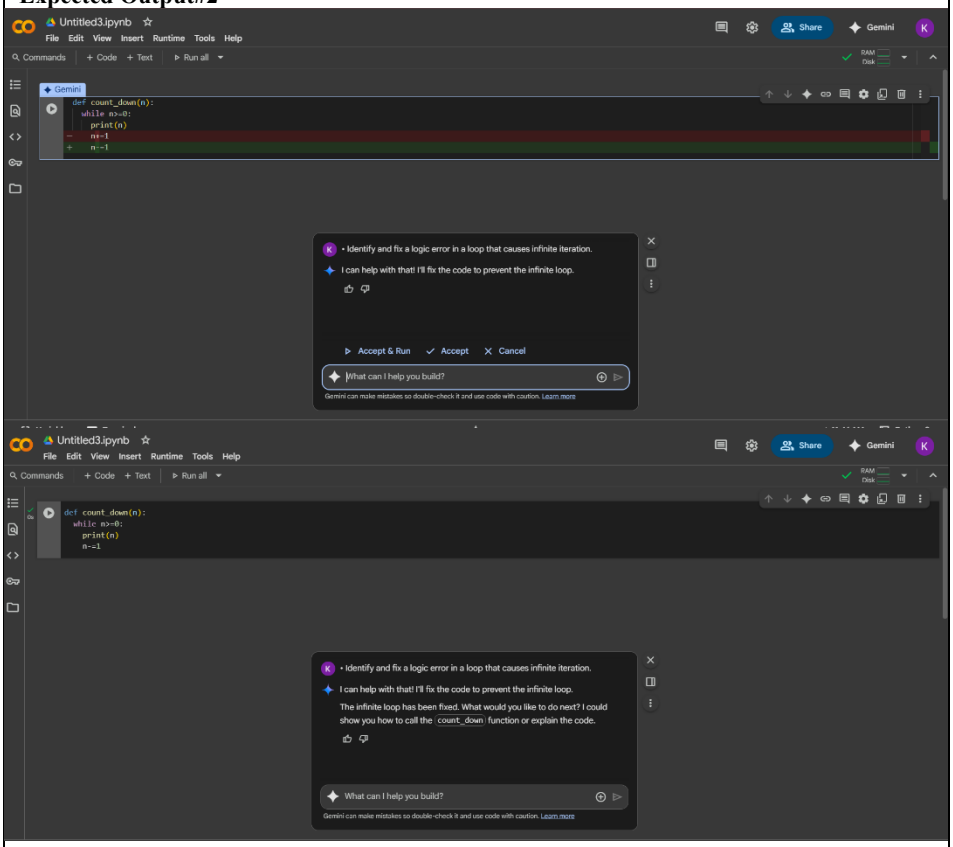


Task Description#2 (Loops)

- Identify and fix a logic error in a loop that causes infinite iteration.

```python
def count_down(n):
    while n >= 0:
        print(n)
        n += 1  # Should be n -= 1
```

Expected Output#2



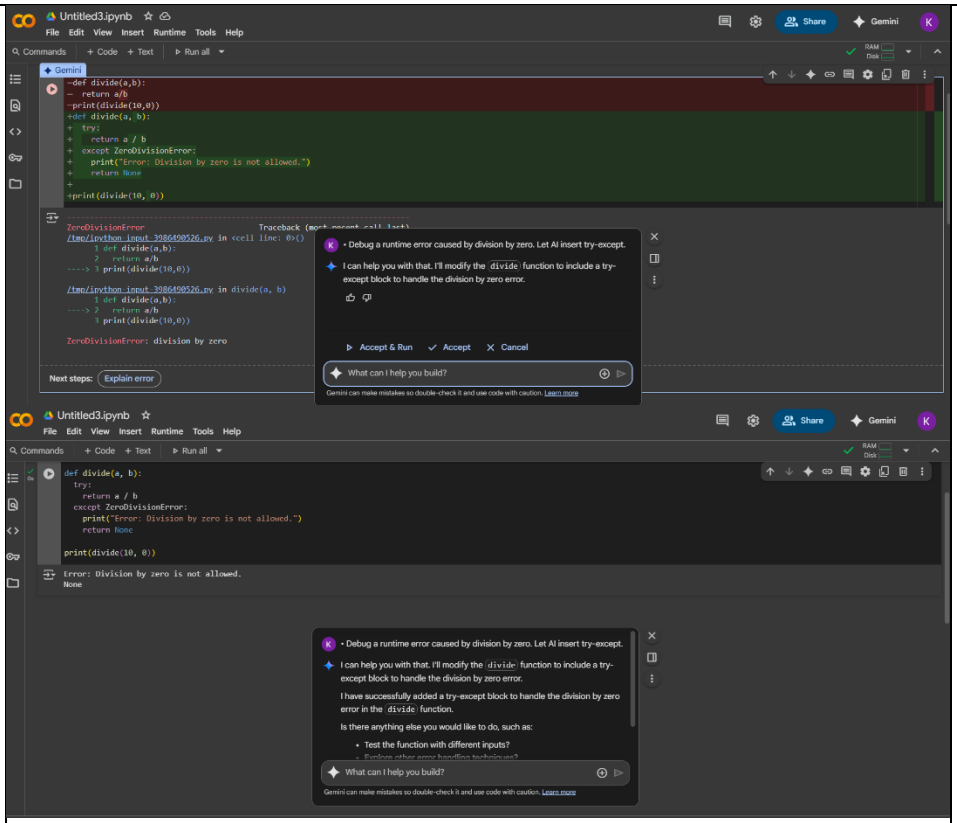
Task Description#3

- Debug a runtime error caused by division by zero. Let AI insert try-except.

```python
# Debug the following code
def divide(a, b):
    return a / b

print(divide(10, 0))
```

Expected Output#3



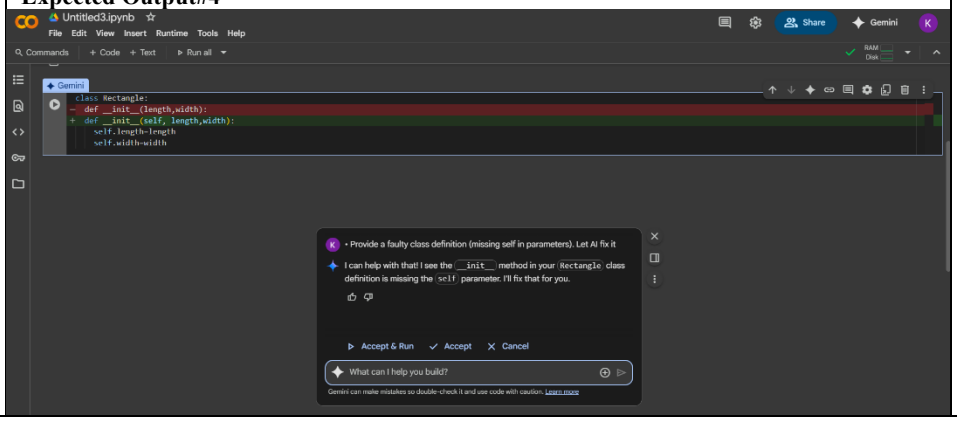
Task Description#4

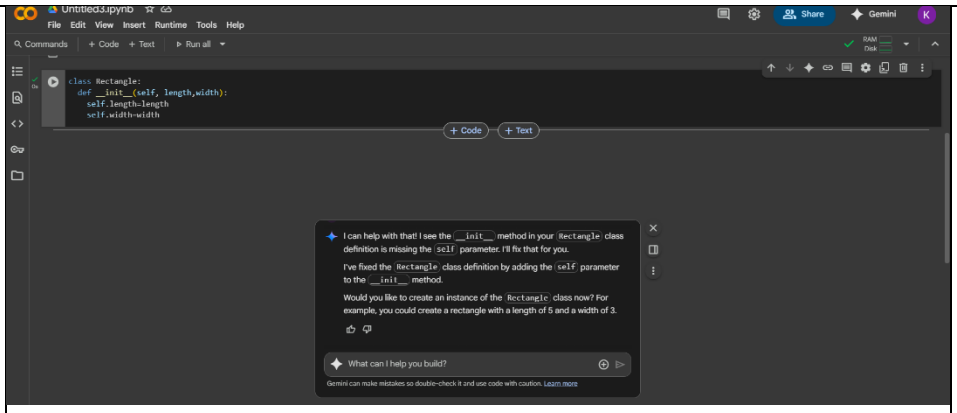
- Provide a faulty class definition (missing self in parameters). Let AI fix it

```
python

class Rectangle:
    def __init__(length, width):
        self.length = length
        self.width = width
```

Expected Output#4





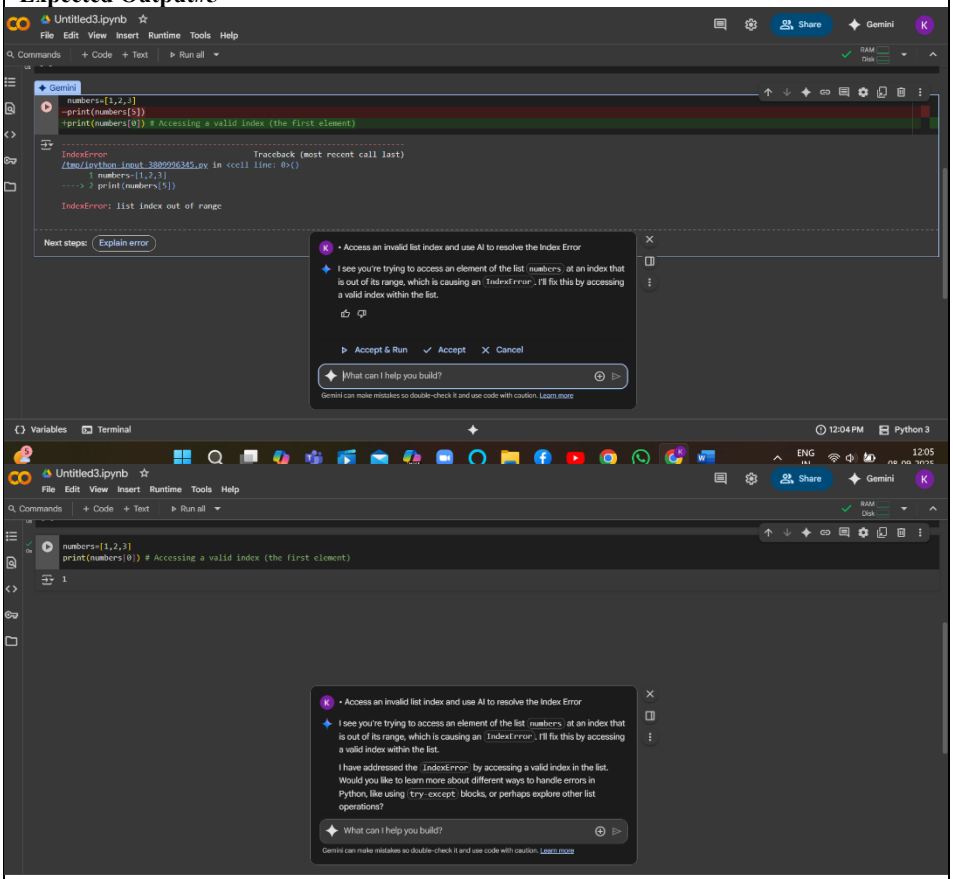
Task Description#5

- Access an invalid list index and use AI to resolve the Index Error.

```
python

numbers = [1, 2, 3]
print(numbers[5])
```

Expected Output#5



Note: Report should be submitted a word document for all tasks in a single document with prompts, comments & code explanation, and output and if required, screenshots

Evaluation Criteria:

Criteria	Max Marks
Identification of bugs	0.5
Application of AI-suggested fixes	0.5
Explanation and understanding of errors	0.5
Corrected code functionality	0.5
Report structure and reflection	0.5
Total	**2.5 Marks**
